

Jonathan Maddison

SUMMARY

I am a self-taught software engineer with expertise in front end development, and a community developer with experience in program management and team leadership. I am passionate about work that has a positive impact on community health and sustainability. I am currently seeking a position as a front end software engineer.

SKILLS

Javascript:	React, Express, jQuery
HTML and CSS:	Bootstrap, Flexbox
Python and C:	
Leadership:	Supervision, Project Management, Strategic Planning
Communication:	Public speaking, Community Outreach, Writing, facilitation

EMPLOYMENT

SELF-TAUGHT SOFTWARE ENGINEER, FREECODECAMP; 2016 — PRESENT

After moving to the Bay Area, I decided to pursue my longtime interest in programming. I am following freeCodeCamp's model to become a full stack software engineer. This includes building solutions to their interesting challenges, and collaborating with a cohort of other freeCodeCamp learners for pair-programming, team projects, and building larger scale collaborative projects.

- Completing a project-based curriculum that requires a mastery of the fundamentals of full stack software engineering.
- Built projects that developed my expertise in: React, Javascript, nodeJS, API development, test-driven development, algorithms, and more; please check out my project portfolio for examples.

WAY2GO PROGRAM MANAGER, CORNELL COOPERATIVE EXTENSION 2013 — 2016

After a year at Cornell Extension I was promoted to lead the Way2Go program: a visionary transportation education and outreach program housed by Cornell Cooperative Extension. I managed a team of community educators that led programs designed to address people's transportation needs in Tompkins County. Under my leadership, Way2Go regionally and supported a sister program in Utica, NY, I grew the biannual Streets Alive event by building partnerships and event sponsors, and recieved over \$200K in new grants to support innovative programming.

- Directed vision and strategy for the Way2Go program through synthesizing input from community outreach with residents, local officials, and other partners
- Recruited, hired, and supervised a team of community educators and interns who are implementing programs.
- Secured funding to achieve Way2Go's Strategic Goals including over \$200K in funding for new programs.
- Oversaw reporting, budgeting, grant writing, and other core program management tasks.

WAY2GO TRAVEL TRAINING COORDINATOR, CORNELL COOPERATIVE EXTENSION 2012 — 2013

I was hired at Way2Go to develop and implement programs to address the needs of people with disabilities, older adults, and people with limited english proficiency. I built a network of stakeholders to identify travel training needs, built a train the trainer program, and lead how-to workshops for community members

- Coordinated three workshops for front line staff and parents to educate them on travel training techniques resulting in over 30 individuals with capacity to conduct travel training in their community.

- Designed and implemented a bus buddy pilot program that operated in 2012-2013 that engaged older adult volunteers to help other older adults use the local transit system.
- Conducted outreach with more than two dozen agencies that provide service to people with disabilities, older adults, or people with limited English proficiency that helped increase collaboration and community coordination around serving the transportation needs of these audiences.

AMERICORPS DISASTER PREPAREDNESS EDUCATOR

2011 — 2012

After graduate school I served as an AmeriCorps educator with the American Red Cross. I was hired to coordinate a disaster preparedness education program in a three county region in upstate New York, right after major floods hit the region. I conducted disaster preparedness workshops, built relationships with program partners, recruited volunteers, and represented the American Red Cross at community events

GRADUATE RESEARCH ASSISTANT, UVM TRANSPORTATION RESEARCH CENTER

2009 — 2011

I was selected for funding as a graduate research assistant at the Transportation Research Center while studying for my Master of Public Administration. My research advisor, Richard Watts, and I studied media reporting on transportation issues. We published several peer-reviewed papers on how the media reports on vehicle emissions (see my publication portfolio). This research formed the basis of my Masters Thesis.

EDUCATION

FREECODECAMP

2016 — PRESENT

freeCodeCamp Full Stack Certification

UNIVERSITY OF VERMONT

2009 — 2011

Masters of Public Administration

UNIVERSITY OF VERMONT

2007 — 2009

B.S. Community and International Development
